Program Director  
IUSE CUE Program  
National Science Foundation

To Whom It May Concern:

It is my pleasure to provide this letter of support for the joint team effort of University of New Mexico, the New Mexico Institute of Mining and Technology, and New Mexico State University. A coordinated framework will be developed by the three research institutions, to enable the exploration of CS+X programs – programs combining the problem solving skills of computational thinking and the disciplinary applications of computing.

As Interim Provost of New Mexico State University, I would like to commit my support in exploring mechanisms to facilitate the sharing of undergraduate curricula and courses among the three institutions. The three research institutions are rich in talent and they provide complementary expertise; we will explore administrative solutions to leverage the distributed expertise to promote state-wide leadership in promoting computational skills across a variety of disciplines.

Sincerely,

A handwritten signature in black ink, appearing to read "April Mason". The signature is fluid and cursive, with a large, sweeping "A" and a long, horizontal stroke at the end.

April Mason, Ph.D.  
Provost
